

TECHNO TEACHES AI

THE PHOTO EDIT PROMPT PACK

9 playful lessons. Copy-ready prompts. One very opinionated cat.

Featuring Techno, the zombie and Wolfie.

Your photo. Your idea.

Techno brings the prompts.

01 / UPLOAD

Start a new chat in your image-editing tool and attach the photo you want to edit.

02 / COPY & ADAPT

Copy a prompt from this pack. Replace anything in [square brackets] with your own details.

03 / CHANGE ONE THING

Make one edit at a time. Keep the result you like, then use that image for the next step.

04 / CHECK & DOWNLOAD

Look closely at faces, hands, edges, shadows and lettering before downloading. Keep your original too.

The golden rule: say what should change AND what must stay the same.

These are reusable photo-editing prompts, not the video-generation scripts. Illustrations show creative concepts, not guaranteed results. Use photos you own or have permission to edit. AI edits can alter details; compare with the original.

Transparency needs a real alpha channel. A checkerboard pattern alone is not a transparent PNG. Restoration cannot reliably recover missing historical detail.

Apocalypse to paradise

Remove, relocate, replace.

REMOVE BACKGROUND

Remove the background from this image. Keep the zombie, including hair and clothing edges, intact. Export as a PNG with a genuinely transparent background.

ADD A NEW SETTING

Place this zombie on a sunny tropical beach. Match the light, perspective and contact shadows. Preserve the character, face, pose and clothing.

SWAP THE PROP

Replace the object in the zombie's hand with a colourful cocktail in a glass. Make the grip natural. Keep everything else unchanged.

TECHNO'S TIP

Try it with a product or a portrait. Check the fingers around the new prop.

Remove that guest

Keep the memory. Lose the distraction.

COPY THIS PROMPT

Remove [describe the unwanted person and their position] from this photo. Rebuild the background naturally. Keep every other person's face, body, clothing and position unchanged. Preserve the original lighting and framing.

TECHNO'S TIP

Point out exactly who should disappear. Check nearby faces and any reconstructed edges.

Same cat. New coat.

A colour change with character intact.

COPY THIS PROMPT

Change only the colour of [the cat's fur / chosen object] to [new colour]. Preserve its texture, markings, shape, pose and lighting. Keep the eyes, collar, background and every other detail unchanged.

TECHNO'S TIP

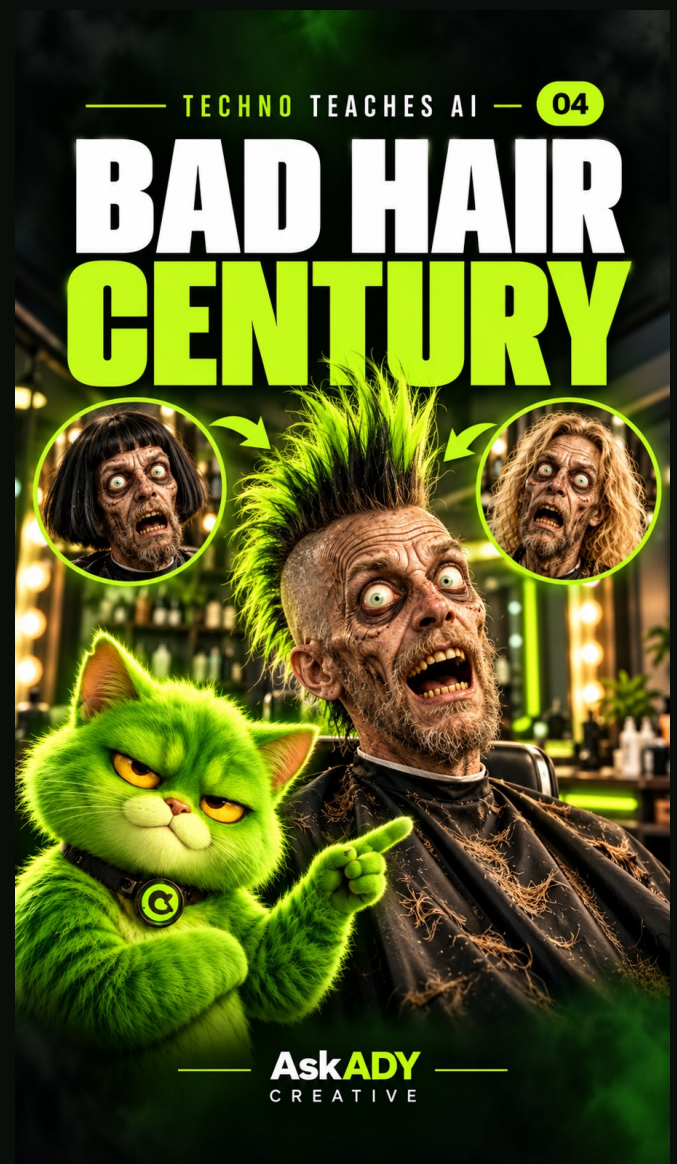

Name what stays the same. Colour changes should keep highlights and shadows believable.

Bad hair century

A fresh look for an ancient problem.

COPY THIS PROMPT

Change this character's hairstyle to [describe the cut, length and colour]. Keep the face, expression, age, clothing, pose and background unchanged. Match the new hair to the scene's lighting.

TECHNO'S TIP

Try one hairstyle per edit. Check the hairline, ears and forehead for unwanted changes.

Save old photos

Repair the damage. Respect the memory.

COPY THIS PROMPT

Restore this old photograph by reducing scratches, dust, creases and fading. Preserve the original faces, expressions, clothing, composition and period character. Keep it black and white. Avoid inventing details that are not visible.

TECHNO'S TIP

Keep the original. Compare facial features carefully; a plausible reconstruction is not proof of historical accuracy.

Dressed to impress

Same character. Better wardrobe.

COPY THIS PROMPT

Replace this character's outfit with [describe the clothes, colours and materials]. Preserve the face, body proportions, pose and background. Add natural fabric folds and shadows that match the original lighting.

TECHNO'S TIP

Describe the entire outfit. Inspect collars, cuffs, hands and clothing boundaries.

Fix the light

Change the mood with one instruction.

COPY THIS PROMPT

Relight this image with warm golden-hour light coming from [left/right]. Create soft directional shadows and balanced highlights. Preserve the subject's identity, pose, clothing and scene composition.

TECHNO'S TIP

Choose a light direction. Check that the face, objects and background agree on where the light comes from.

Remove the distraction

Give your beach photo room to breathe.

COPY THIS PROMPT

Remove the bin at [describe its location] from this beach photo. Reconstruct the sand and scenery behind it with matching texture and perspective. Preserve all people, the horizon, lighting and the rest of the image.

TECHNO'S TIP

Zoom in on the repaired sand. Watch for repeated textures or objects that have shifted.

Wolfie's kennel glow-up

A makeover, one paw click at a time.

01 / REDECORATE

Give this brown kennel a pastel-pink and white makeover. Keep its shape and position, the garden and Wolfie unchanged. Preserve her cartoon style and sable markings.

02 / ADD A BOWL

Add a matching pink bowl with a white rim beside the kennel entrance. Match the perspective and shadows. Keep everything else unchanged.

03 / FINISH THE LOOK

Change only Wolfie's collar to pink and white to match the kennel. Keep her face, fur colour, body, pose and the rest of the image unchanged.

TECHNO'S TIP

For a real room: upload your room photo, name your colours and budget, and ask to preserve its layout.

One edit is the start.
Your ideas do the rest.

Save the prompt. Try your own photo. Show us what you make.
